

HARSHIT SINDHU

+91 7303375464 | harshitsindhu10@gmail.com | LinkedIn | LeetCode | New Delhi, India

PROFESSIONAL SUMMARY

Backend-heavy Full Stack Developer with ~2 years of experience building scalable B2B web applications. Core contributor responsible for ~50% of backend architecture of a customer experience analytics platform, including database design, API development, and performance optimization. Proficient in Node.js, TypeScript, PostgreSQL, and React/Next.js.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, C++, SQL
Backend:	Node.js, NestJS, Express, REST APIs, SSE, BullMQ
Frontend:	React, Next.js, Redux, HTML, CSS, Tailwind CSS
Databases & Caching:	PostgreSQL, pgvector, Redis, MongoDB, Drizzle ORM, TypeORM
AI / Agents:	Anthropic SDK, Model Context Protocol (MCP), Voyage embeddings, RAG
Tools & Platforms:	Git, GitHub, Vercel, Neon, Postman, Linux, Agile/Scrum

WORK EXPERIENCE

Software Developer | Zykr, New Delhi

June 2024 – Present

- Architected and built the backend for a B2B customer experience analytics platform, owning ~**50%** of the backend implementation from database design to production-ready services.
- Designed and delivered **100+** RESTful APIs using Node.js, Express, and TypeScript, serving feedback collection, survey management, and analytics reporting modules.
- Modeled and normalized **15+** PostgreSQL tables with optimized indexing strategies, supporting complex analytical queries across large datasets.
- Engineered caching layers using Redis, reducing redundant database hits and improving API response times for high-frequency endpoints.
- Drove frontend development using React and Next.js, building dashboards and data visualization components for the analytics platform.

Tech Stack: TypeScript, Node.js, Express, PostgreSQL, Redis, React, Next.js, REST APIs

Vocational Trainee | Engineers India Limited, New Delhi

May 2022 – July 2022

- Developed **2** internal web applications using C# and ASP.NET for data management workflows.
- Optimized database operations using Toad, improving data retrieval efficiency by **15%**.

Tech Stack: C#, ASP.NET, HTML, CSS, JavaScript

PROJECTS

Reverse Resume — Citation-Grounded RAG Portfolio

[Link](#)

- Built a citation-grounded RAG site over **4** indexed code repos and **30+** documentation snippets, achieving a **1.0 retrieval eval score**; every assistant answer cites real code with [n] markers backed by pgvector semantic search and BM25 fallback.
- Designed audience-aware voice steering (curious / recruiter / engineer) and a 4-tab answer card (TL;DR / Impact / Code / Story) with lazy-loaded tabs, in-process token-bucket rate limiting, and a daily LLM spend cap — shipped across **13 atomic implementation phases**.

Tech Stack: TypeScript, Next.js 15, PostgreSQL + pgvector, Drizzle ORM, Voyage embeddings, Anthropic SDK, Vercel, Neon

Job-MCP — Model Context Protocol Server

[Link](#)

- Built a Model Context Protocol server exposing ~**12 TypeScript tools** (search-jobs, match-resume, refine-message, adaptive search, ...) over stdio transport, consumable from Claude Desktop, Cursor, and any MCP-compatible client.
- Engineered fail-fast environment validation with dependency-injected tool registration — missing API keys surface at process startup rather than first tool call, and every handler is testable in isolation.

Tech Stack: TypeScript, Model Context Protocol SDK, Node.js

EDUCATION

B.Tech in Computer Engineering

2020 – 2024

Delhi Technological University, New Delhi | CGPA: 8.26/10

ACHIEVEMENTS

- Solved **400+** Data Structures and Algorithms problems on LeetCode, GeeksforGeeks, and CodeStudio.
- 5-star rated in Problem Solving on HackerRank.
- Completed Walmart USA Advanced Software Engineering Virtual Experience Program on Forage (October 2023).
