PROFESSIONAL SUMMARY

Backend-heavy Full Stack Developer with ~2 years of experience building scalable B2B web applications. Core contributor responsible for ~50% of backend architecture of a customer experience analytics platform, including database design, API development, and performance optimization. Proficient in Node.js, TypeScript, PostgreSQL, and React/Next.js.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL
Backend: Node.js, Express, NestJS, REST APIs
Frontend: React, Next.js, Redux, HTML, CSS
Databases & Caching: PostgreSQL, MongoDB, Redis
Tools & Platforms: Git, GitHub, Postman, Linux, Agile/Scrum

WORK EXPERIENCE

Software Developer | Zykrr, New Delhi

June 2024 – Present

- Architected and built the backend for a B2B customer experience analytics platform, owning ~50% of the **backend implementation** from database design to production-ready services.
- Designed and **delivered 100+ RESTful APIs** using Node.js, Express, and TypeScript, serving feedback collection, survey management, and analytics reporting modules.
- Modeled and normalized **15+ PostgreSQL tables** with optimized indexing strategies, supporting complex analytical queries across large datasets.
- Engineered caching layers using Redis, reducing redundant database hits and improving API response times for high-frequency endpoints.
- Drove frontend development using React and Next.js, building dashboards and data visualization components for the analytics platform.
- Engaged in architectural design discussions, sprint planning, and code reviews in an Agile team environment.

Tech Stack: TypeScript, Node.js, Express, PostgreSQL, Redis, React, Next.js, REST APIs

Vocational Trainee | Engineers India Limited, New Delhi

May 2022 – July 2022

- Developed 2 internal web applications using C# and ASP.NET for data management workflows.
- Optimized database operations using Toad, improving data retrieval efficiency by 15%.

Tech Stack: C#, ASP.NET, HTML, CSS, JavaScript

PROJECTS

Pro-Shop – MERN E-Commerce Platform

[Link](#)

- Created a full-stack e-commerce application with the MERN stack featuring user authentication, product management, shopping cart, and PayPal payment integration.
- Developed admin panel for product/user/order management, product search with pagination, and review/rating system.

Tech Stack: React, Redux, Node.js, Express, MongoDB

Email Spam Classifier – ML Model

[Link](#)

- Built an email spam classifier using Naive Bayes algorithm on a 5,574-message dataset, achieving 97% accuracy through feature engineering and model tuning.
- Developed an interactive Streamlit GUI for real-time spam classification and model transparency.

Tech Stack: Python, Scikit-learn, Streamlit

EDUCATION

B.Tech in Computer Engineering

2020 – 2024

Delhi Technological University, New Delhi | CGPA: 8.26/10

ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms problems on LeetCode, GeeksforGeeks, and CodeStudio.
- 5-star rated in Problem Solving on HackerRank.
- Completed Walmart USA Advanced Software Engineering Virtual Experience Program on Forage (October 2023).
